Art Unit: 2833

1. The disclosure is objected to because paragraph 18 is unclear and appears to be missing text. Appropriate corrections are required.

2. Claims 10-15 are objected to because of the following informalities:  
In claims 10 and 13, on the last line, it appears that "keeps" should be changed to -remains-. Appropriate corrections are required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bakermans, et al. This connector comprises an insulative housing forming a slot 42 between side walls. Each sidewall defines passageways (between the vertical portions of barriers 18) for electrical contacts 14b and recesses between the passageways and the outer face of the sidewalls.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The connector of Zaderej, et al. comprises recesses between the contacts that remain open and would afford better heat dissipation.

6. Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-15 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.
